

# INTRODUCING

*Established in 1994, Vosk is on a steady path to become one of the leading brand of ceiling, exhaust, pedestal & multipurpose fans and heating appliances. Vosk stands for quality.*

*Our quality is never accidental; it is a result of high intention, intelligent direction and skilful execution and it represents our wise choice of materials and resources. Our manufacturing facility is certified under ISO 9001:2015 quality certification. Our endeavour to success is not based upon the ideas of economies of scale but on **Zero Defect Maximum Effect policy**. We aim to nurture, test and manufacture, probably, the best product in the market.*

*On our journey to the summit, we hope that you will join us and make Vosk become an even better brand than today.*

*In the year gone by, we have tried to evolve more as a digitally accessible brand and infra-structurally sound manufacturing facility.*

*In that regard, we launched [www.voskfans.in](http://www.voskfans.in) If you haven't seen it yet, we hope you check it now. Everything on our website is a statement, whose words are derived from our inspiring business partners.*

*Our facility has undergone several changes over the past year, to now being evolved into one of the most cleanest and technically equipped facilities for manufacturing fans and heating appliances.*

*Our goal, however, in the past year has not changed. We are still dedicated to provide the highest quality and we hope to stand by the same goal for years to come. In that journey we hope you would continue to support us and guide us with your valuable feedback on our systems and products.*

*So, please receive this not just as our product portfolio, but also, our brand report for **what is yet to come.***

**THE YEAR GONE BY AND  
WHAT IS **YET TO COME...****

# P E D E S T A L F A N S

Our range of Pedestal Fans have classic features such as telescopic arrangement for full height adjustment by contemporary collet, along with front and back ribs for safety. They also provide extra protection against corrosion with powder coating guard and polymer ring. Our fans have a specially designed high torque motor. They come in a unit packing with easy assembly and have aero-dynamically balanced blades.
